Overview

This document provides a comprehensive summary of the test execution activities carried out for the LuxeChain platform. It captures the results of all functional, technical, and workflow validations performed during the testing cycle. Each test scenario has been evaluated to ensure that the core features of the platform such as user onboarding, product registration, authentication, ownership transfer, listing, and related operational flows-perform reliably and as intended.

Test Case ID	Test Case Title	Test Steps	Test Data	Expected Result	Actual Result	Result	Screenshot	Cardanoscan Url
