

Overview:

This document provides a consolidated view of users successfully onboarded into the LuxeChain application during the onboarding phase. It serves as an authoritative reference for validating account creation, system integration, and data persistence across the application and database layers.

The document includes:

- A tabular representation of onboarded users, where user identifiers have been masked to protect personal information while preserving traceability and uniqueness.
- A database snapshot of the users table, demonstrating that the onboarded users are correctly stored and maintained within the system's persistent data layer.

All users listed have completed the onboarding process and are actively registered within LuxeChain. The masking applied to user identifiers ensures compliance with data privacy and security best practices, while still allowing for internal verification and audit purposes.
